DETAILS

Key features

19" Wall-Mounted Rack Cabinets are ideal for small installations, available in depths of 450 or 600 mm and heights of 6, 9, 12, 15, and 18 units. The packaging includes 4 adjustable feet as standard for floor positioning. The new line features a load-bearing structure made of steel sheet, consisting of 4 corner uprights with perforations for accessory mounting. It is equipped with a double pair of 19" rack uprights. With a steel sheet structure, the cabinet ensures a static load capacity of up to 50 kg at full load. All components are made with 10/10 thickness, except for the uprights, which are 12/10 thickness. Available in the colour Black RAL 9005

Construction Features

Removable glass door, reversible on both sides, with a 180° opening angle. Made of steel sheet structure with a 5 mm safety glass panel bonded to the structure. All glass panels are tempered. Lockable with a key. Wall Cabinets ATHENA

Removable side panels in steel sheet with grounding provision.

Top and bottom made of steel sheet with double opening for cable entry and provision for a double-leaf door.

Rear panel in steel sheet with grounding provision and perforations for wall mounting.

4 retractable uprights in galvanised steel sheet with double perforation for cage nuts.
