DETAILS

Key features

The range of floor-standing cabinets is the line that best meets the practical and installation needs of the modern era. Gone are the days of heavy floor-standing rack cabinets, fully welded, with excessive thicknesses that required mechanical tools to be moved. Today, a rack cabinet must be robust, practical, aesthetically pleasing, but above all flexible, which means easily disassembled without tools and fully inspectable. The new range of floor-standing cabinets features a fully disassemblable and easily reassemblable structure, with the option of using a base (optional accessory) with a simple interlocking application that is easy to mount but especially facilitates the levelling of the cabinet by adjusting the feet inside. Customization options with Single or double doors or Grilled or solid side panels. Standard equipment includes levelling feet, and 800 mm wide cabinets are prepared for vertical cabling with 19" guide rings and panels. Available in Grey RAL 7035 and Black RAL 9005.

TECHNICAL FEATURES

Characteristic	Value
Floor Standing Cabinets 800X600	Load-bearing structure in 15/10 steel sheet totally removable composed of 4 corner plates with holes for the attachment of accessories.
